Junior UX/UI Designer | Computer Engineering Background

Junior UX/UI Designer with a degree in Computer System Engineering and professional training in Web Design in Germany. Experienced in creating user flows, wireframes and interactive prototypes in Figma through training and project-based work. Interested in designing intuitive, responsive and accessible digital experiences. Familiar with HTML and CSS, with basic knowledge of JavaScript and front-end development.

German: B2 | English: B2

CORE SKILLS

UX/UI Design: Figma, user flows, wireframing, interactive prototyping, responsive UI design, visual design

UX Research: User interviews, surveys, usability feedback, requirements analysis (based on project experience)

Design Systems: Reusable UI components, brand guidelines, accessibility principles

Front-End Fundamentals: HTML, CSS, basic JavaScript, Webflow

Additional Exposure: React, Storybook, AI-assisted design tools

EXPERIENCE & PROJECTS

UX/UI Design Volunteer Project, Ferment-Freude
Jan 2026 – Present

Volunteer · B2C online shop & workshops

- Contribute to the design of an online shop and workshop booking experience.
- Create user flows, wireframes and Figma prototypes to explore and communicate interface solutions.
- Gather customer feedback and help identify usability issues and potential improvements.
- Contributed to brand strategy, creative direction and brand guidelines.
- Explore visual concepts using AI-assisted design tools.
- Apply front-end fundamentals when working on interface implementation, where appropriate.

Web Design Weiterbildung, Beam Institute of Technology
2024 – 2025

Professional training with team-based projects

- Practised UX research methods, including user interviews, surveys and usability reviews.
- Created user flows, wireframes and interactive prototypes in Figma.
- Worked on responsive, mobile-first website design using HTML, CSS, JavaScript and Webflow.
- Gained experience with design systems, reusable components and accessibility principles through team-based projects.

Freelance Web Developer
2016 – 2020

Self-employed

- Worked with clients to translate business requirements into responsive web interfaces.
- Contributed to web application development and maintenance.
- Considered usability and consistency across different devices and screen sizes.

SELECTED PROJECTS

Ferment-Freude: Online Shop & Workshop Booking 2026

Volunteer project · Case study: alaashaheen93.github.io/Alaa-Portfolio

- Explored the user experience of an online shop and workshop booking journey.
- Created interface concepts and design assets aligned with the brand direction.
- Worked on user flows, prototypes and potential usability improvements.

Design Systems & Accessibility 2024 – 2025

Team projects, Beam Institute of Technology

- Worked with reusable UI components and responsive interface patterns.
- Explored accessibility principles and consistent design practices.
- Used Figma and relevant development tools within team-based projects.

EDUCATION

Computer System Engineering 2011 – 2016

Al-Azhar University

Web Design Weiterbildung 2024 – 2025

Beam Institute of Technology
